SUMMARY

Full-stack developer who takes web products from first commit to production and owns them there. I work across TypeScript/JavaScript and React/Next.js on Node and PostgreSQL — with Python in the mix — and use AI tooling throughout design, build, and testing to move faster without dropping the bar. Focused on UX-led, AI-assisted prototyping and engineering-aware design: I prioritize tests that catch real bugs, simple architecture, and systems that hold up under load to deliver measurable business value. Computer Science student at Vistula University, already shipping real client products.

TECHNICAL SKILLS

TypeScript, JavaScript, Python, SQL

Jest (unit), Selenium WebDriver (E2E), k6 (load), Testing & QA

Node.js, REST APIs, PostgreSQL, MongoDB, Supabase

Git, CI/CD, Vercel, Agile, end-to-end ownership

React, Next.js, Tailwind CSS, HTML/CSS, UX, Figma

EXPERIENCE

Front-End Developer (Intern)

Sep 2025 - Jan 2026

GLP Software Solutions • Warsaw, Poland

- Built and shipped a customer-support chatbot from design through deployment using AI-assisted development; owned end-to-end QA, deployment, and monitoring.
- Debugged and optimized multiple client websites, conducting security and performance checks and implementing fixes to improve stability and load times.
- Collaborated with product and engineering stakeholders to prioritize UX and technical fixes during sprint cycles.

Full-Stack Developer

Mar 2025 - Jul 2025

CodetechIT Solutions • Bangalore, India

- Designed and implemented automated backup protocols to protect against system failures and speed recovery.
- Built and maintained full-stack features for customer feedback collection and response handling, increasing engagement 12%.
- Tested and optimized the live product, improving sales conversions by 5% through targeted fixes and performance tuning.
- Owned monitoring and incident response to maintain service availability and responsiveness.

PROJECTS

Chroma UI — Digital Marketplace for UI/UX Templates

- Built a UI/UX template marketplace using Next.js, Node.js, Supabase, and Tailwind CSS; shipped live.
- Developed reusable UI templates and storefront components to accelerate customer onboarding.
- Managed deployment and performance tuning to ensure fast page loads.

Automated Test Suite — Portfolio Web App

- Built a multi-layer test suite (Jest unit, Selenium E2E, k6 load) for a deployed web app to catch regressions and validate performance.
- Integrated tests into CI/CD to run automated checks on every deployment and reduce regressions reaching production.

Wonderlust — Travel Agency Website

- Designed and shipped a multilingual travel-agency website end-to-end and deployed live.
- Implemented responsive UI and localization to serve users in multiple languages.
- Handled deployment and ongoing maintenance to keep the site available to customers.

EDUCATION

Vistula University
Web Technologies & Development | B.Sc.

2023 - 2027

- Member, Vistula IT Club
